The FDA is seeking team-oriented patient-focused junior, mid-career, and senior Engineers (Biomedical, Electrical, General, Materials, and Mechanical) to join the Center for Devices and Radiological Health’s (CDRH) medical device premarket review teams. These exciting opportunities are located in OPEQ's Office of Health Technology VI (OHT VI), where the mission is to ensure the safety, reliability, and effectiveness of orthopedic devices. As a member of the team, you will have the chance to learn from and collaborate with Center and Agency colleagues and our partners and stakeholders in industry, academia, and in the scientific and health care communities to ensure patients and providers have continued access to safe, effective, and high-quality orthopedic medical devices.
